PROJECTS

BlogWorld – A Blogging Platform

- Description: Developed a blogging platform with post creation, likes, comments, and media uploads.
- Implemented CKEditor for content editing, Firebase for storage, and Zod for data validation.
- Designed a modern and engaging UI using Shadcn UI and Tailwind CSS, ensuring a visually appealing user experience.
- Technologies: MERN Stack (MongoDB, Express, React, Node.js), Shadcn UI, Tailwind CSS, Redux Toolkit, React Icons, Cloudinary, CKEditor, Firebase, Slugify, Zod.

DocEase – Doctor Booking Web Application

- Description: Developed a responsive and user-friendly web application enabling patients to register, search doctors by specialization, view profiles, and book appointments with real-time availability tracking.
- Built role-based features for doctors to manage their profiles and time slots, and for admins to control doctor records and monitor all users and bookings through a secure dashboard.
- Integrated JWT authentication and global state management using useContext, and designed a clean, responsive UI using Tailwind CSS for seamless navigation across patient, doctor, and admin interfaces.

Mingle (Social media application)

- Description: Developed a social media application inspired by Instagram but themed around the TV series FRIENDS.
- Implemented core features like user authentication, post sharing, likes, comments, and real-time chat.
- Designed a modern and engaging UI using Shadcn UI and Tailwind CSS, ensuring a visually appealing user experience.
- Technologies: MERN Stack (MongoDB, Express, React, Node.js), Tailwind CSS, Socket.io, Shadcn UI, Redux Toolkit.

Management Information System Project (University)

- Led a team of 5 members to develop a news portal web application using Agile methodologies.
- Created project schedules, defined milestones, and assigned tasks using Trello.
- Successfully delivered the project within the set timeline, improving team coordination and efficiency.
